[Common 12] Concerning marking of "licensee of JIS certification", etc. on package/packing surface of the uncertified products by licensee.

Question:

Some our products obtain JIS certification. Is it possible to mark licensee of JIS certification" or similar marking to the package or packing surface of the uncertified product? JIS mark is not marked on them.

Interpretation:

No, it is not possible.

Because doing such can mislead users in a manner that gives an impression that non-applicable products are also JIS certified, it conflicts with the item (iv) of paragraph (1) of Article 15 of "the Ministerial Ordinance concerning Certification of Conformity with Japanese Industrial Standards".
